

Diving Essentials

“We become what we behold. We shape our tools, and thereafter our tools shape us”
 –Marshall McLuhan

At Sea Solutions Singapore, we believe that operators working sub surface deserve to be properly and adequately equipped. In any situation, having the right tools and equipment for the job can make the task a breeze, ensure proper protection or possibly even save a life.

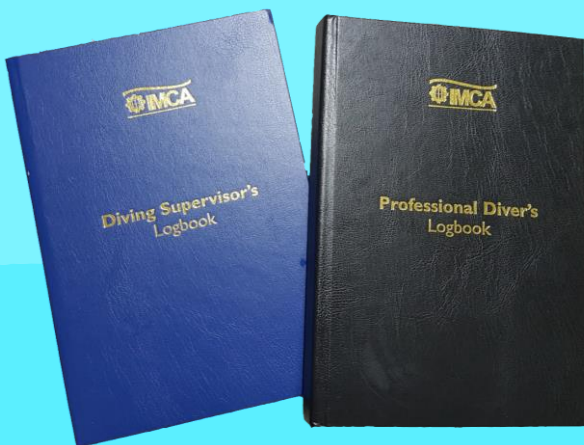

Work Gear

We supply an assortment of essential diving gear:

- Scuba tank harnesses
- Subsea-tooling bags
- Regulators
- Diving booties
- Masks
- 40m rated flashlights (Toshiba)
- PowerJet high performance fins (high current compatible)

Kirby Morgans

The Kirby Morgan bandmasks and helmets have been the trusted brand in the commercial diving industry for the past 5 decades. With its reliability and robustness, these kits will serve any diver well. We are proud to carry this name and the various models that are available. We can also provide non-invasive modification to suite customer requirements. (i.e. welding visors, additional lighting, cameras)

Logbooks

Keeping track of ones work progress can be a daunting task but essential in the offshore work especially so in diving. A persons record of work, relates to both their competency as well as their experience in various work environments.

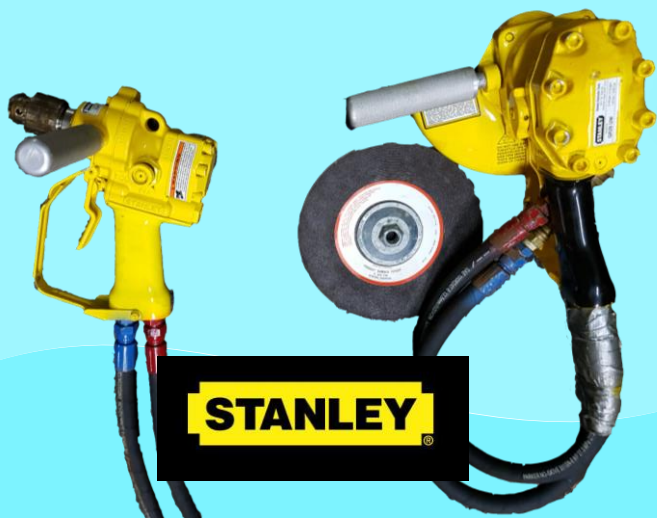

At SSS, we can supply IMCA recognised logbooks to help you keep track of your dive times and jobs that you have been on.

Diving Tools

All tooling and equipment from Sea Solutions Singapore go through functional and safety checks before they reach to our clients. We take pride in ensuring that the kit you receive is in the best possible state before leaving our care.

Lighting and Camera

During subsea inspection your deliverables are what makes or breaks a job. Understanding this, we provide comprehensive solution to underwater lighting and videography. All our cameras and LED lights are rated to more than 40m (>4 bar). Various scales of LED lumens are available to cater for individual needs. Likewise for cameras, be it SD, HD or 4k.

STANLEY Underwater Tooling

When one thing of underwater tooling for diving operations, STANLEY comes to mind. Known for their robust capabilities in the roughest of environments Stanley subsea tooling has stood the test of time and challenge. We provide various configurations and spares for STANLEY tools, be it drilling, cutting, grinding. If you require a STANLEY tool for the job, you have come to the right place.

Seacon Cables

At Sea Solutions Singapore, we have a vast selection of Seacon cable connectors. We provide cable termination services, tail end and cable supplies should you require. (SEACON RMG-4-MP, SEACON RMG-4-FS.. etc)

Hoses

We supply high pressure rated hydraulic hoses (>200bar) for any hydraulic system requirements that you may require. Customisation of fittings and lengths are also available.

BrushKart

The Brushkart has become an essential part of hull cleaning over the past decade. They provide an effective and quick alternative to manual cleaning, if properly maintained. Proper spares always make a difference when it comes to equipment such as these.

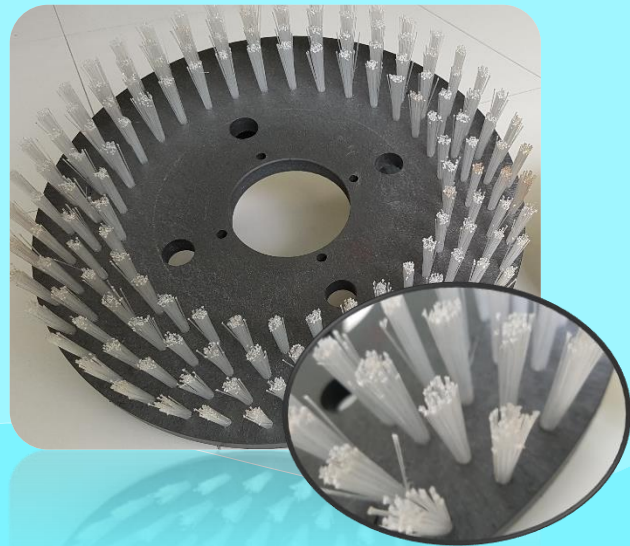

Brushkart service and repair

Here at Sea Solutions Singapore, our technicians and staff are equipped and trained to maintain and refurbish brushkart units. We also assist with new builds and A-frame fabrication.

Sea Vortex™ Brush

Sea Vortex™ brushes have their bristles mechanically riveted into the brush body making more resilient to snags during operations. The bristles themselves consist with high-density polyethylene, making them chew through or brush off algae, barnacles and other marine growth with ease. It does all this effectively without damaging the surface and paintwork of the hull. Bristle customisation available.

MegGrip™ Tires

One of the most common issues with most brushkart operations is the slippage and loss of traction of the tires. The MegGrip™ Tires strong alternative to conventional brushkart tires. Its high-density nitrile compound is resilient to oil and heat. Traction ratings exceed that of other known brushkart tires, even through algae and seaweed. Military grade material and quality.
